Introduction

LAK 2080-2132 d.c. motors are fully laminated, 2 pole design.

Output: 0.5-20 kW
Torque: 4-75 Nm

The LAK programme comprises:

Frame size	Core lengths
2080	A, B, C
2100	A, B, C
2112	A, B, C
2132	A, B, C

Type designation example -
LAK 2112B:

LAK = Type of motor
2 = Number of poles
112 = Centre height
B = Core length

Basic design characteristics

- Fully laminated stator, main poles and interpoles.
- Low induced voltage due to well proportioned ratio between length and diameter of armature.
- Low bar to bar voltage ensures good commutation.
- Large thermal masses (copper and steel weight) give high thermal time constant.
- Well designed end frames and louvres ensure easy inspection and reduce noise.
- NDE spigots and stub shafts as standard to accept adaptors for all well known makes of tachometers and pulse generators.
- High efficiency through low field losses and well proportioned airgap between armature and stator.
- Minimal brush and commutator wear due to good commutation. 1-phase thyristor supply without external inductance saves price and space.
- Excellent short time overload characteristics which allow choice of smaller motor in many cases.
- Designed for high armature voltages as standard.
- High mechanical and electrical flexibility.
- Painting with excellent corrosion resistant properties.
- Conforms with IEC, BS and VDE standards.
- Available according to NEMA.
- Available CSA approved.

Application data

Standards

IEC 34 – IEC 72
VDE 0530 – BS 4999

Insulation

Class F

Balance

IEC 34-14 grade 'N'.
Grade 'R' on request.

Temperature rise

Class F, 105°C by resistance.

Overload capacity

1.6 x FLT for 15 seconds every
5 minutes.
2.0 x nom. armature current for
30 seconds every 15 minutes

Terminal box position

Standard: top mounting.
Side-mounting on request.

Blower position

LAK 2080 and 2100:
On either side of the motor.
LAK 2112 and 2132:
On top or either side of the
motor.

Bearings

Sealed-for-life preloaded ball
bearings.

Armature voltages

Available up to:
LAK 2080-2100: 470 V
LAK 2112-2132: 570 V

Output data

Select motor frame size against voltage, output and speed. For intermediate output, take the nearest higher output listed under the next frame size. For intermediate speed take the next lower speed listed within the output required.

Each motor winding is defined by a code number shown in the output data lists:

Example:

LAK2112B

4.95 kW - 1510 min⁻¹ - 440V

Code number = 3421-1250

The output lists are based on:

- **Cooling forms IC06/IC17/IC37.**
- **The armature circuit resistance is for duty warm condition.**
- **The inductance listed is for the armature circuit.**
- **Motor supply from:**

400V-440V-460V:

3-phase fully controlled thyristor supply.

180V-310V:

1-phase half controlled thyristor supply.

Constant power / constant torque

The full field or base speed is listed for each winding. Constant power is available from this speed if required. Armature voltage: for +/- 10% the output and speed is proportional to the voltage. In the case of small motors the same output and speed can often be obtained for different voltages.

Duty cycles

Ratings: All outputs are duty type S 1. For other ratings or special duty cycles, refer to our sales office.

All outputs are based on use without external inductance.

Windings

All motors in the output lists are shunt wound.

Compound or series winding motor data on request.

Other shunt winding motor data available on request.

Armature voltage

Other armature voltages, and motor data on request.

Ambient temperature and altitude

Outputs in this catalogue are based on max. 40°C ambient temperature and max. 1000m a.s.l.

If higher derate and select from the output lists.

Temperature	+5°C	+10°C	+15°C	+20°C
Cat. output	0.97	0.93	0.89	0.85

Altitude	2000m	3000m	4000m
Cat. output	0.94	0.87	0.77

NEMA

Motor data and dimensions on request (NEMA catalogue).

IC01/410/416

Motor data on request.

Founded over 100 years ago, T-T Electric is a world-class supplier of top-quality industrial electric motors and drives. Pioneers in the industry, we are an experienced and established manufacturer of a comprehensive and cost-effective range of highly reliable drive products. They are used around the world in the toughest of application environments and in all industrial segments.

Driven by customer demand, T-T Electric is continually researching product excellence and manufacturing

process perfection. The flexible product design ensures easy adaptations to customer requirements. This, combined with unequalled short delivery times, make T-T Electric a reference within industry. Our extensive support services include diagnostics and maintenance on site as well as full overhaul in our own repair facilities.

T-T Electric is committed to a working partnership with our customers. For mutual benefit, we focus on complete and innovative solutions together.
